

To make plastic you need:

- oil
- machines
- heat
- molds
- people

We found out that the oil comes from under the ground.

Old trees and dead things rot away and after a very, very, very long time it can turn into oil.

How long does it take? by clara of millions of years.

How do we get the oil out of the ground? by clara With drills and pumps.

How hot does it get heated?
