

We were not sure about  
flowers.

Some of us said they are  
natural.

Other children said no. Seeds  
are natural BUT people have  
to plant seeds to make flowers  
grow.

What do you think?

In the wild seeds are move about by birds eating  
them and pooping them and by the wind.  
So people are not needed to plant  
seeds by poppy

Some seeds need to be planted  
by people. by Ryan

I agree with poppy and Ryan  
by Keira
