

Year 6 homework: **Weaving for nest making**

Brief: We are going to design and make a nest as a prop for the school production.

RESEARCH

You are to conduct some research about nests.

Present a page with pictures, and some written statements of at least 3 different sorts.

Identify the bird that makes the nest.

What materials does the bird use?

How is the nest actually made (how does the bird make a curve, if the material used is straight?)

Can you draw how you think at least one nest is made?
