

AutoQUILL

Excellent Thinking and detail.

Outcome and Evaluation

I predict they will increase the amount of flavours

- Caramel
- White chocolate raspberry
- Cookies and Cream
- Normal

Moment in time

I expected more in a packet because it costed \$8! It looks very crunchy and a bit like polystyrene. The pieces could have been cut a bit smaller and it seems like there is more in the chocolate than the hokey pokey! ↑

I agree

Vanilla OMG! This is the best ice cream I have ever tried! It is creamy and just like a meringue. It didn't taste like hokey pokey and it tasted like milk but I really enjoyed it! It was crunchy and the after taste was a soft cream taste. I would eat bags of this freeze dried ice-cream.*

Chocolate This flavour tasted like milo. The after taste tasted like the real ice cream and when you sucked it it turned into ice cream. This was a lot crunchier and melted in your mouth. This flavour would really appeal to kids who love chocolate (my sister). I can imagine this with (real normal ice cream because you would have something soft and crunchy. "

Excellent.

OUTCOME DEVELOPMENT AND EVALUATION

I predict that they will make a range of flavours. ✓

We would like dairy free options. ✓

Possibly a lower price. ✓

Maybe egg free options if possible. ✓

MOVEMENT IN TIME

Looking at it makes me wonder, it looks different than I thought. I thought that it would at least look more well shaped like. When you look closely it's as if it's hard on the outside, but soft on the inside. It has this kind of rough, coarse taste. One part of me likes it, one part of me has to think about it. ✓ It has a really creamy taste. ✓ It starts to melt the moment you bite it. It feels like polystyrene but it's delicious. ✓ It leaves a very nice taste in your mouth and when it sticks on your teeth it tastes like marshmallow. ✓ The girls did fabulous jobs to make it and the results were spectacular. ✓ I loved the girls freeze dried ice cream. The thought that it used to be ice cream is amazing. ✓✓
